Abstract

This template illustrates the formatting of full length papers for ILASS Europe 2023 proceedings. Please do not change any formatting, such as margins. The abstract should be no longer than 200 words.

Introduction

The typical length of an ILASS Europe 2023 paper should be 8-12 pages. Your manuscript must be submitted in PDF file format by e-mail to ilasseurope@stems.cnr.it before May 15th, 2023. The maximum file size must not exceed 10 MB.

Material and methods

The title of the paper is centred text, Arial, font size 14, bold. Authors and institutes are centred text, Arial, font size 11, followed by 1 blank line. Headlines are formatted Arial, font size 9, bold while the text itself is not in bold. The line spacing is 1.15 without spacing before or after a paragraph. If you wish to *highlight any text*, only use italics.

Results and discussion

You may rename the headlines of each paragraph and/or add new ones. You may insert figures (see Figure 1) or tables (see Table 1) in any part of the text.

Since the Conference Proceedings with the full length papers will be published electronically on the conference website, it is possible to use colours in illustrations and figures.

The Conference Proceedings including the fulllength papers will be distributed electronically (USB-stick). Thus, the use of colours in illustrations and figures is possible.

Figure 1. Example of a figure. Caption in Arial, font size 8, centred, Figure and figure number bold. Spacing before caption is 6 pt.

The example in Figure 1 shows how to include a figure into the text. You should use 1 blank line before and after the figure. The same applies to tables. Use the table example format provided below.

Table 1. Example of a table. Caption in Arial, font size 8, centred, Table and table number bold. Spacing after caption is 6 pt.

	Column 1	Column 2	Column 3
Row 1	5	34	67
Row 2	6	45	75
Row 3	7	46	64
Row 4	8	56	53

Please use SI units in all text, figures and tables. Equations should be left-aligned, with the equation number in

parentheses in sequential order included flush right, as in the below equation

$$F = ma. \tag{1}$$

Equations should be referred to by equation numbers. All symbols should be printed in italics or otherwise according to conventional practice, both in the equations and in the text. There is a spacing of 6 pt. before and after each formula. The nomenclature section should immediately precede the references.

Conclusions

Acknowledgements

Nomenclature

<i>a</i>	acceleration [m s ²]
<i>F</i>	force [N]
<i>m</i>	mass [kg]

References

References should be indicated in the text by full sized numbers enclosed within square brackets. Use different formats for journals [1], books [2], symposium proceedings [3] and web pages [4] as illustrated in the examples below. You may use "ASME" citation style in Endnote.
